SUMMARY

Motivated Software Developer with hands-on experience in Full Stack and Mobile Application Development using Python, FastAPI, React.js, Supabase, PostgreSQL, and MySQL. Skilled in building scalable RESTful APIs, responsive web and mobile applications, and secure backend systems. Strong problem-solving abilities with internship and project experience, seeking an entry-level Software Developer or Full Stack Developer role.

SKILLS

- **Programming Languages:** Python, JavaScript, SQL
- **Web Technologies:** HTML, CSS, REST APIs, GraphQL, JWT Authentication
- **Tools:** Git, GitHub, Postman, MySQL Workbench
- **Frameworks:** React.js, FastAPI, Bootstrap, SQLAlchemy
- **Databases:** MySQL, PostgreSQL, Supabase, Firebase
- **Concepts:** Full Stack Development, Mobile App Development, API Development

WORK EXPERIENCE

Flutter & Web Developer Intern | KSV Technologies **July 2026 - Aug 2026**

- Developed and enhanced web and mobile application interfaces using Flutter, Dart, and web technologies.
- Built reusable UI components and responsive layouts to provide consistent user experiences across devices.
- Assisted with debugging, testing, and resolving application issues to improve functionality and usability.

Full Stack Developer | Younder Bots (OPC) Pvt Ltd **Sep 2025 - Jan 2026**

- Developed and integrated RESTful APIs using FastAPI and MySQL for efficient backend data processing and system communication.
- Built responsive frontend components using React.js and collaborated with cross-functional teams to develop scalable full-stack applications.
- Contributed to debugging, testing, and deployment workflows to improve application reliability and performance.

EDUCATION

Bachelor's Degree | Erode Sengunthar Engineering College **2022 - 2026**

- Artificial Intelligence and Data Science
- CGPA: 7.64

Higher Secondary | Sengunthar Higher Secondary School **2021 - 2022**

- Computer Science
- Percentage: 72%

PROJECTS

1. **Selavu — Trip Expense & Settlement Platform**

   Technologies: Flutter, Dart, Supabase, PostgreSQL

   - Developed a group travel expense management app to manage trips, members, shared expenses, payments, and settlements.
   - Implemented flexible expense splitting, real-time settlement calculations, and tracking of outstanding balances.
   - Integrated Supabase Authentication, Google Sign-In, and cloud database synchronization.
   - Built spending analytics, trip history management, and biometric app-lock functionality.

2. **Anvesha — Travel Booking & Experience Platform**

   Technologies: Next.js, FastAPI, MySQL, Microservices

   - Developed a full-stack travel platform supporting bookings for hotels, flights, trains, buses, tour packages, and travel experiences.
   - Implemented customizable travel packages with optional accommodation, transportation, and experience add-ons.
   - Designed centralized booking management and an admin dashboard for managing travel inventory and reservations.
   - Structured the backend using microservices to separate travel and booking services.

3. **Kadhambari — Landscape & Gardening Platform**

   Technologies: Flutter, Firebase, Razorpay

   - Developed a landscaping and gardening platform combining botanical product sales with professional gardening services.
   - Implemented plant browsing, category-based search, product details, shopping cart, checkout, and payment integration.
   - Designed service request workflows for landscape design, irrigation planning, and garden maintenance.
   - Integrated cloud-based product data and image management with administrative tools for products, orders, customers, and services.

4. **Crime Rate Prediction — Machine Learning & Crime Analytics**

   Technologies: Python, Pandas, NumPy, Scikit-learn, Matplotlib, Flask

   - Processed historical crime datasets and performed exploratory data analysis and feature engineering to identify crime patterns.
   - Developed supervised machine learning models to classify crime categories using historical data.
   - Analyzed crime trends across time periods and visualized patterns using Matplotlib.
   - Built a Flask-based interface to display predictions and analytical insights.
