PROFESSIONAL SUMMARY

Full-stack software developer experienced in building REST APIs with Python (FastAPI) on MySQL and PostgreSQL, and responsive interfaces with React.js and Next.js. Delivered 4 end-to-end projects: a microservices-based travel booking platform, a payment-enabled e-commerce application, an expense settlement app, and a machine learning crime analytics tool. Strong in API development, database management, and testing.

SKILLS

Programming Languages: Python, JavaScript, SQL
Frontend Development: React.js, Next.js, HTML, CSS, Bootstrap
Backend Development: FastAPI, REST APIs, GraphQL, SQLAlchemy, JWT Authentication
Databases: MySQL, PostgreSQL, Supabase, Firebase
Tools and Platforms: Git, GitHub, Postman, MySQL Workbench, Razorpay
Technical Concepts: Full-Stack Development, API Development, Microservices, Database Integration, Debugging

WORK EXPERIENCE

Flutter & Web Developer Intern **July 2026 – Sep 2026**
KSV Technologies
- Developed web and mobile application interfaces in a combined Flutter and web development role.
- Built reusable UI components and responsive layouts that adapt to different screen sizes.
- Tested application features, debugged defects, and resolved issues to improve application reliability.

Full Stack Developer **Sep 2025 – Jan 2026**
Younder Bots (OPC) Pvt Ltd
- Developed and integrated RESTful APIs using FastAPI and MySQL to support backend data processing and application communication.
- Built responsive React.js components and connected the frontend interfaces to backend services.
- Performed systematic debugging and testing and supported deployment workflows to improve application reliability.

PROJECTS

Selavu — Trip Expense & Settlement Platform
Tech Stack: Flutter, Supabase, PostgreSQL
- Built a group travel expense management application for tracking shared expenses and settlements.
- Implemented expense splitting, balance calculations, and outstanding payment tracking.
- Added authentication, cloud data synchronization, spending analytics, and biometric app locking.

Anvesha — Travel Booking & Experience Platform
Tech Stack: Next.js, FastAPI, MySQL, Microservices
- Developed a travel platform supporting 5 booking types: hotel, flight, train, bus, and tour.
- Designed a microservices architecture that separates booking operations from travel services.
- Implemented centralized reservation management and an administrative inventory dashboard.

Kadhambari — Landscape & Gardening Platform
Tech Stack: Firebase, Razorpay
- Developed e-commerce workflows covering product browsing, search, cart, checkout, and Razorpay payments.
- Connected gardening service requests with cloud-based product management on Firebase.
- Built administrative workflows for managing products, orders, and customers.

Crime Rate Prediction — Machine Learning & Crime Analytics
Tech Stack: Python, Pandas, Scikit-learn, Flask, Matplotlib
- Processed historical crime datasets and engineered features for predictive modeling.
- Developed supervised machine learning models to classify crime categories.
- Built a Flask interface that presents predictions and Matplotlib visualizations of crime trends.

EDUCATION

Bachelor's Degree in Artificial Intelligence and Data Science **2022 – 2026**
Erode Sengunthar Engineering College, Erode | CGPA: 7.64

Higher Secondary, Computer Science **2021 – 2022**
Sengunthar Higher Secondary School, Erode | Percentage: 72%
